MEMORANDUM FOR: Chief, RID/ADB

**VIA : SR/RMO
: C/DDP/SG**

**SUBJECT : Request for Special Listing Based on
RIS Machine Program -- Query No. 132**

1. CI Staff needs a printout of all material input to the RIS Machine Program from overt sources. Such a listing would provide the inputters (who work under conditions somewhat different from staff personnel in official Agency buildings) with a means for precluding duplicate inputting, and for editing out non-essential data. Unfortunately, programming does not exist which will handle this kind of query in which records would have to be separated from within personality summaries.

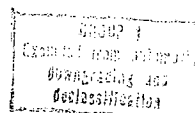

2. Recently, DDP/Systems Group ran two queries against source information, and produced two tapes:

(a) all personality summaries which contained any information from overt sources (GICS RIS Query No. 1/Beal, tape number 0810). This contains 4915 personality summaries.

(b) all personality summaries which contained information from both overt sources and from other than overt sources in the same personality summary (GICS RIS Query No. 2/Beal, tape number 1699). This contains 572 personality summaries.

3. Since we cannot remove overt material from within those personality summaries containing data from both overt and other sources, and since we do not wish to pass data from other than overt

SECRET

SECRET

sources to our inputters, we will have to settle for a printout of those personality summaries based solely on overt material. This then would be tape (a) (0810) minus tape (b) (1699). This printout would warrant a classification of **CONFIDENTIAL**.

4. It is therefore requested:

(a) that a cross-reference list be produced in two copies from tape (b) (1699).

(b) that a listing of arbitrary numbers only be printed from tape (b) (1699). (This could be accomplished by printing the tape with all fields except A-1 suppressed.).

(c) that RID/Keypunch punch arbitrary number delete cards on these 572 personality summaries, using the arbitrary number list produced in paragraph (b).

(d) that a duplicate of tape (a) (0810) be produced.

(e) that the arbitrary number delete cards be run against the duplicate of tape (a), producing the desired overt-source-only tape.

(f) that a printout of this tape be prepared in 6 copies, with the same number of alphabetic-to-arbitrary-number cross-reference lists.

5. This query has no operational priority, but from the point of view of administering and controlling input from overt sources, there is a present need. It is therefore requested that the listings be produced as soon as convenient; in any event, no later than 10 days from the receipt of the request. It should be noted that this query does not involve the RIS master tape, and therefore should not require as much computer time as a full-fledged query.

6. The above procedure should be viewed as a proposal. All recipients of this memorandum are requested to review it to insure that it is sound, and that it will in fact produce what we need.
